Abstract (en)

[origin: EP1342636A1] The door (2a,2b) consists of two similar doors, is joined to a side wall (1) on one side at a corner pillar (15) and is operated about a vertical axis by a linear control element (4) mounted on the carriage structure on one side and interacting with the inside of the door on the other side via a connecting arm (5) connected to a linkage (6) mounted on the corner pillar.
