Abstract (en)
[origin: EP1342669A1] The container has a rim section (108) extending round the upper edge of the sidewalls. The rim section has at least one corner section with a raised edge (134) which has at least one section (136) which is convexly curved when viewed from the inside of the container. The raised edge also has at least one section (138) which is concavely curved when viewed from the inside of the container. The raised edge may have two convexly curved sections with the concavely curved section between them. The concavely curved section has a smaller radius (R1) of curvature than the convexly curved section.
