Abstract (en)

[origin: EP1342879A2] The metal cabinet has a vertical blind running in a lower guide rail (52) supported on the rigid base. The base includes a panel (33) which is supported on framework which is welded together. The metal cabinet with a vertical blind includes a base, side walls, a top and a base. The base is formed from a robust frame comprising two parallel rails (30) and two transverse bars (31) provided with screws for adjusting their height. A central bar (32) extends between the two main rails in the center. The long rails and transverse bars are welded together to form a single piece which support the lower guide rail (52) for the vertical blind. The base includes a panel (33) which is supported on the framework provided by the longitudinal and transverse rails. Rollers are fitted to the end transverse bars.
