Abstract (en)

[origin: WO0243847A1] The invention concerns a method, a module and a device for contacting a gas and a liquid. The method consists in distributing the liquid, in the presence of the gas, in jet form along a first direction on a wall sloping at an angle of 35 to 55 degrees relative to the first direction, the wall dispersing the liquid jet into the gas. The module comprises means (23, 25) for distributing a liquid jet along a first direction, means (21) for generating a gas stream, and a wall sloping at an angle of 35 to 55 degrees.
