Abstract (en)

[origin: WO0242085A1] A method and a device for forming characters in an output material (2) by altering its shape, such as for creating Braille writing, by shaping the heated output material (2). The output material (2) is heated by directing a delimited beam of thermal radiation on the area to be heated and by forming a character of variable shape by pushing a pin-like member (4) into the heated area.
