Abstract (en)  
[origin: WO0249877A1] The invention concerns a modular removable device for interior equipment of transport vehicles in particular of palletised goods, particularly lorries, standard trailers or semi-trailers, characterised in that it comprises: a series of substantially ladder-like elements (1, 1') designed to be arranged in opposite pairs along the vehicle inner longitudinal walls, and a series of transverse elements or rails (10) linking the ladder-like elements (1, 1') located opposite on either side of the vehicle inner enclosure and designed to support the transported goods.
