Abstract (en)  
[origin: WO0248489A2] The invention relates to a door arrester for motor vehicle doors. The door arrester comprises a holder housing (3) with a passage opening (7) for a retaining bar (2) and comprises a swinging element (15) which, in relation to the passage opening (7), can swivel toward the narrow face of the retaining bar (2). The door arrester also has a spring element (14) for acting upon the swinging element (15). The arresting of a motor vehicle door can be effected in an inexpensive and reliable manner due to fact that at least one supporting first housing part (4) of the housing (3) is produced from plastic in an injection molding method.
