Abstract (en)
[origin: WO02052280A1] The invention concerns a sensor-holder block (15) designed to be fixed on a ring (1) of a bearing for detecting a rotational parameter of a ring (1) relative to another ring (6). The sensor-holder block (15), annular in shape, comprises a receptacle (22) opening on the outside and provided with electrical connecting means completely arranged in said receptacle (22) and/or in said sensor-holder block (15).
