Abstract (en)

[origin: WO0237375A1] A method to capture data pertaining to an agricultural product commences with the capture of location data (450) indicating the location of a custodial location (48) within a chain of custody for agricultural products by capturing a location identifier associated with the location. Product data, reflecting the condition of the product, is also captured (102). The product data may include environmental data characteristic data or activity data.
