Abstract (en)

[origin: WO0237429A1] The invention concerns a device for controlling a user's access to an online service or to premises comprising at least a digital image acquisition apparatus (2), a storage unit (4) containing at least a reference image and an image comparing module (6). The inventive device is characterised in that it further comprises a central unit (8) enabling the user to define the reference image and to generate at least an access code comprising at least a characteristic parameter of the defined reference image.
