Abstract (en)
[origin: EP1344743A1] The invention relates to commercial equipment and can be used for dispensing beer from isothermal containers. <??>In order to preserve the initial parameters of the beer when setting a multipoint distributing system the inventive beer-dispensing device is provided with a dispenser, a supercharging system and a cooling system, according to invention, the dispenser is made in the form of N closed circuits, where N is a whole number, and is provided with a pump for circulating beer along the dispenser and with a beer cooler, and a holding valve and a flow homogeneity sensor are arranged on the main beer-delivery pipeline.
