Abstract (en)

[origin: EP1344874A2] Methods and devices for building-in a gully, consisting of a gully member (1) and an extension ring member (2), into a floor or roof. The methods are characterized by a first construction step during which an eventual extension ring member (2) is held temporarily fixed to the gully member (1) in a first position in which flanges (9 and 6), by adjusting the extension ring member (2) to a second position in which its flange (9) extends horizontally and flush with the future top surface of the floor or roof structure, and by a second construction step during which the extension ring member (2) is held temporarily fixed to the gully member (1) in said horizontal position until the extension ring member (2) is finally fixed therein with the flange (9) flush with the top surface of the floor or roof structure. <??>The devices comprise to this end one, alternatively two fixing means (26;26,27). <IMAGE>
