Abstract (en)
The system has a sliding element (s), a bearer element(s) extending in the sliding direction and a sliding element fitting(s) that can be moved in the sliding direction and that holds the sliding element. The sliding element consists of at least partly transparent material and has at least 2 transparent electrically conducting tracks in the transparent part for invisibly supplying a current load in or on the sliding element with electric current. The system has at least one sliding element (2), at least one bearer element extending in the sliding direction and at least one sliding element fitting (6,8) that can be moved in the sliding direction and that holds the sliding element. The sliding element consists of at least partly transparent material and has at least two transparent electrically conducting tracks (10,12) in the transparent part for invisibly supplying a current load (14) in or on the sliding element with electric current.

Abstract (de)
Bei einer Schiebeelementanlage, mit mindestens einem Schiebeelement (2), mindestens einem sich in Schieberichtung erstreckenden Tragelement (4) und mit mindestens einem Schiebeelementbeschlag (6,8), der längs des Tragelementes (4) verschiebbar ist und das Schiebeelement (2) hält, ist vorgesehen, dass das Schiebeelement (2) zumindest teilweise aus transparentem Material besteht und mindestens zwei transparente, elektrisch leitende Strombahnen (10,12) in dem transparenten Teil aufweist, die einen Stromverbraucher (14) auf oder in dem Schiebeelement (2) unsichtbar mit Strom versorgen und dass über den mindestens einen Schiebeelementbeschlag (6,8) den transparenten Strombahnen (10,12) des transparenten Teils des Schiebeelementes (2) Strom zuführbar ist. <IMAGE>
