Abstract (en)

[origin: EP2324753A1] The device has an arrangement formed on an insert for cutlery and/or small crockery for feeding droplets of a washing liquid into problem zones of the insert. The insert has several openings (9) for the passage of washing liquid bounded by bridges (1-4) intersecting in a plane at crossing points (5-8). The bridges are inclined so as to form a diamond-shaped cross-section.
