Abstract (en)

[origin: WO0245904A1] A sectional curtain serves to cover machine parts, in particular machine tool parts. Said curtain comprises a number of members (9, 10) connected to each other in a jointed manner. In order to increase the speed of deployment or retraction of the sectional curtain (9, 10), individual members (9) of the sectional curtain (2, 3) are connected to a scissor-action lattice (14, 15, 16, 17).
