Abstract (en)

[origin: WO0174588A1] The invention refers to a form (1) comprising a form layer (2) with at least a section of printable material, an adhesive layer (3), a separating layer (5), an intermediate layer (4) between the adhesive layer (3) and the separating layer (5), and a magnet (7), said adhesive layer (3), separating layer (5) and intermediate layer (4) are arranged between the form layer (2) and a cover layer (6). In order to avoid the drawbacks of known forms comprising a magnet, it is suggested that the magnet is a magnetic layer (7) integrated in the intermediate layer (4).
