Abstract (en)
[origin: WO02053689A2] The invention comprises a melt cast detergent composition with a solids content less than 30%, exhibiting a yield stress >75kPa at a temperature range 20-40 DEG C, comprising (iv) 2-50% by weight saturated fatty acid soap comprising one or more salts of C6-C24 fatty acids; (v) 2-40% by weight of detergent active species; (vi) 30-80% by weight water and optionally one or more liquid benefit agents, wherein the composition does not show pure lyotropic liquid crystalline phase in the temperature range 20-100 DEG C and forms an isotropic liquid phase or a dispersion of lyotropic liquid crystalline phase in a continuum of isotropic liquid at a temperature within the range 40-100 DEG C.
