Abstract (en)  
[origin: WO0250952A1] The invention relates to an antenna assembly (1), in particular for determining the distance between or speed of motor vehicles. Said assembly comprises: devices (2) for receiving or transmitting signal waves; a multilayer support (5) positioned below the devices (2); a first earthed potential surface (4), located on the surface of the support (5) facing the devices (2); coupling devices (3) located in the first potential surface; electric connection sections (7) positioned as close as possible below the first potential surface (4); and a second earthed potential surface (10) located below the connection sections.
