Abstract (en)
Helmet (1) provided with a shell (10) and a visor (11) connected to it in a given manner so as to movable with respect to the shell (10), said visor (11) comprising a first transparent element (13) for protecting the eyes and a second element (18) of the type which is movable with respect to the shell (10) and can be connected to the latter in a selectively stable manner on lateral front portions (16) of the said shell (10) symmetrical with respect to each other, for protecting the chin. For this purpose, the second element (18) has a resistance greater than that of the visor (11) and substantially identical to that of the shell (10), the first and the second elements (13, 18) being rigidly connected together so that they are operationally movable as a single body (20). <IMAGE>
