Abstract (en)

[origin: EP1346659A2] The holder/dispenser (1), especially for coins of different values, consists of a receptacle (2) with a supple plastic insert (10) having radial ribs (16) and a ring containing a guide (11), a pusher (12) and a flexible vane (13). The ribs, which have Y-shaped flexible ends, form separate compartments for objects (100) such as coins of different sizes. The coins can be dispensed as required through outlet slots (5) by means of a manually or electrically operated selector (4) on the receptacle's lid (3).
