Abstract (en)
[origin: EP1347234A2] The system has at least one transparent decorative element (1) with at least one bore (2), at least one light source (4) for illuminating the element and a mechanical holder (3) for the element extending into the bore. The light source(s) is arranged in the bore(s) in the element and the current feed to the light source(s) passes via the relevant holder. AN Independent claim is also included for the following: a mechanical holder for a decorative transparent element of an inventive system.
