Abstract (en)

[origin: EP1347540A2] The housing (2) has a cable insertion opening (1) and an internal connection element (6) for at least one cable. A bearer element (3) can be pulled out via the opening, is connected to the connection element and has an attachment section at one end with a cable opening and an attachment region for the connection element at the other end. The bearer and connection element can be pulled out to connect the cable then pushed back into the housing. AN Independent claim is also included for the following: a bearer element for a connection element.
