Abstract (en)
[origin: WO02053397A1] The invention relates to a system for monitoring the vehicle dynamics of a vehicle with a sensor (10) measuring the wheel force, for determining a wheel force on at least one wheel (12) of the vehicle and means (14, 16), for processing the determined wheel force, whereby a state of the damper for the wheel (12) may determined from the result of the processing. The invention further relates to a method for monitoring the vehicle dynamics of a vehicle.
