Abstract (en)
[origin: WO02053429A1] The invention relates to a system for monitoring the properties of at least one tire (12) in a motor vehicle (36). The system is characterized in that means for storing information are provided on the tire, said information representing properties of the tire (12), as well as sensors (20, 22) that detect said information. The invention further relates to a method for monitoring the properties of at least one tire.
