Abstract (en)

[origin: EP1348547A2] The method has image information recorded on a printing plate via regions having differing surface characteristics by application of an ink (31) in accordance with the image information and use of a photocatalytic effect for provision of hydrophile regions (20) in the uncovered areas and lipophile regions (30) in the covered areas. Also included are Independent claims for the following: (a) a device for recording image information on the surface of a printing plate; (b) a rotary offset printing machine
