Abstract (en)
[origin: GB2384749A] The file for holding paper has a front cover 4 and a rear cover 2. A mounting unit 7 is connected to the rear cover 2 adjacent the spine 3. The mounting unit has two spaced-apart arms 8, 9 which define a slot 11 between them. One of the arms 9 is of tapering form, being thin at one end and thick at the other. A slider 13 engages these arms and is slidable relative to the arms. As the slider slides so the arms move towards one another, thus reducing the width of the slot to effect a clamping action.
