Abstract (en)
[origin: EP1349133A1] Anchorage system used to attach label holders to shelves in order to display labels with information about product prices, characteristics, etc. The system is made up of two basic components: the label holder and the shelf. The label holder is made up of a low, transparent two-sheet strip with variable length. At the rear of the band there are pins that anchor it to the housing provided at both front ends of the shelf thanks to the annexed fold of the laminated shelf. At the top of the label holder there is a small recess to position it in either a vertical or tilted position. <IMAGE>
