Abstract (en)

[origin: EP1349433A2] The device has a load chain (1) containing the light sources (11-13), a controlled current or voltage source with a connection to the load chain, a connection to a constant current or voltage source (UB) and a third connection. The device has a regulator (2) connected via the third connection to the control current or voltage source and to a temperature sensor (3) as the actual value sender. The light sources are light emitting diodes (LEDs). An Independent claim is also included for the following: a headlamp with an inventive device.
