Abstract (en)

[origin: WO02054908A1] Table comprising a fixed worktop (10) under which there are attached the legs for the support thereof, as well as a pull-out, ie. extractable extension (30). The means (20) used to link the fixed worktop (10) with the extension (30) comprise members (21, 23) that are attached on respective section planes (13, 32) and are provided with interacting part (22, 24) extending along an axis (Z) that is orthogonal to said inclined section planes (13, 32). In this manner, the sole and only operation that has to be carried out in order to extract to retract the extension (30) is a rotation by 180 DEG about said axis (Z). The fixed worktop is preferably either rectangular or square while the same worktop and the extensions can even be made with crystal panes.
