Abstract (en)
[origin: WO02053099A2] The present invention provides for a method for the treatment of alveolar bone loss due to periodontal disease in a subject in need of such treatment comprising administration of a therapeutically effective amount of an alpha v beta 3 integrin receptor antagonist in combination with a therapeutically effective amount of a COX-2 inhibitor. Further, the present invention provides for pharmaceutical compositions useful in the methods of the present invention, as well as a method of manufacture of a medicament useful for treating the alveolar bone loss due to periodontal disease.
