Abstract (en)
[origin: US2004082267A1] The invention relates to a toy vehicle, particularly for track-guided car racing circuits, that comprises a drive motor (10), which has a drive shaft (12), and comprises a driven axle (14), which is provided with wheels. A transmission (16) is mounted between the drive shaft (12) and the driven axle (14), and the transmission (16) is provided in the form of a manual transmission (16) that is shifted by the direction of rotation of the drive motor (10).
