Abstract (en)
[origin: WO02053725A2] The invention relates to a method for inclusion immobilising at least one biologically active component, whereby the biologically active component is mixed with a solution of a matrix material and a complex substance is added to the matrix material. The invention is characterised in that the matrix material is used as a chain of a repetitive carbohydrate sequence, the carbohydrate sequence comprising two glucose molecules and two additional non-glucose carbohydrate molecules.
