Abstract (en)

[origin: EP1350578A1] Bending machine for bending rod- and/or bar-like workpieces comprises a base body (2) provided with a holder (6) for a workpiece and a tool unit (15) with at least one bending tool. The tool unit is rotatably mounted on a pivoting support (10) about a tool axis of rotation (16) running in the longitudinal direction (12) of the workpiece. The axis of rotation (11) of the pivoting support and the axis of rotation of the tool and also the axis of rotation of the tool and a workpiece holder are offset from each other. Preferred Features: The pivoting support is a pivoting arm.
