Abstract (en)

[origin: EP1351105A1] The display (43) consists of an indicator (46) which sweeps over concentric disks. An outer disk (47) shows days of the week for four weeks and two disks (51,52) show the day of the month for first and second parts of the month. The month is displayed on an inner disk (56). The first and second day of the month disks are successively displaced by amounts to allow for the month length and then restore correct order
