Abstract (en)
[origin: EP1351266A2] A light (10) in a separate casing (9) is located inside the chamber (8) of the switching section (5). To connect its (10) first leg (12), a pre-compressed coiled spring (11) projecting into the casing, also presses against a contact section (4). This is mounted to pivot in the base (2). At the second leg (13), a further spring similarly connects to a fixed contact (3).
