Abstract (en)

[origin: WO02052954A2] A nutritional composition is described for prevention or treatment of a bone condition. It comprises, in a broad definition, at least calcium, magnesium, zinc, vitamin D and vitamin K. For example, in an embodiment it comprises per 300 g: about 800 mg calcium, about 210 mg magnesium, about 15 mg zinc, about 10 ug vitamin D, about 60 ug vitamin K, about 1.5 mg copper, about 5 mg vitamin E, about 30 mg vitamin C, about 90 mg soy isoflavone and about 6 g inulin/FOS (30:70) blend. A method for making the composition; use of it in the manufacture of a functional food or medicament; and a method of prevention or treatment of a bone condition which comprises administering an effective amount of the composition are described.
