Abstract (en)

[origin: WO02057147A1] The invention concerns a formed package enclosing a stack of rigid products such as biscuits and associating in superimposition a paper or cardboard blank (1) and a film (2). The invention is characterised in that the blank (1) has a cut-out zone (16) defining a region for seizing the products and the film (2) has a strip (3) which is secured thereto and which covers at least partly said cut-out zone (16), the film (2) and the strip (3) forming an opening device for releasing the cut-out zone (16), the removal of successive products being operated by gravity in placing the package in an upright position.
