Abstract (en)

[origin: WO02055532A2] Conjugates exhibiting growth hormone (GH) activity and comprising at least one non-polypeptide moiety covalently attached to a GH polypeptide, the amino acid sequence of which differs from that of wildtype human GH in at least one introduced and at least one removed amino acid residue comprising an attachment group for said first non-polypeptide moiety. The first non-polypeptide moiety is e.g. a polymer molecule such as PEG or a sugar moiety. The conjugate finds particular use in therapy.
