Abstract (en)  
[origin: US2003213272A1] For fastening water level regulators on parts of washing machines, an adapter including a housing having first and second portions each for accommodating a water level regulator, a fastening device for fastening the adapter on parts of a washing machine, and two openings in the accommodating portions for accommodating a fastening device disposed on the respective water level regulator. The fastening device of the adapter is disposed in a central portion of the housing, the first accommodating portion is disposed in a first side portion, and the second accommodating portion is disposed in a second side portion, the central portion being bounded by the two side portions. The opening in the first accommodating portion is disposed substantially perpendicularly to the opening in the second accommodating portion.
