Abstract (en)

[origin: WO0242562A1] A paving (1) comprising at least one element (2) with a number of cast paving stones (4) is laid with intermediate joints (3) and vibrated on a foundation of a particulate material (18) completely or partly filling the joints (3) as well. At least one mesh (5) embedded in the stones (4) and joining the stones (4) of the element (2) is serving for securing a particulate filler material (19) in a joint during even heavy showers and cleaning with sweeping and sucking machines as at least a part of the mesh (5) which is in the joints (3) has a small-meshed structure (6) and is embedded in the upper part of the stones.
