Abstract (en)

[origin: EP1352593A1] Hanging device for wall furniture comprises a housing (7) for fixing to the furniture and a hook (8) adjustably fixed in two directions on the housing by an adjusting device. The housing is inserted in a form- and force-locking manner without connecting devices in a correspondingly shaped recess in a wall facing the furniture. The components of the adjusting device holding the hook are held exclusively in a force- and form-locking manner within the housing. Preferred Features: The adjusting device has a length-adjusting screw (9) rotatably and axially but not displaceably positioned in the housing and engaging in a thread of the hook. The adjusting device has a height-adjusting screw (10) rotatably and axially but not displaceably positioned in the housing and passing through a slot in the hook and a nut fixed in the hook. The housing is made of plastic.
