Abstract (en)

[origin: EP1352862A2] Method for selective supply of sheets or header-sheets to a sheet processing machine with a sheet feeder, whose separating and transporting elements are individually operated. Accordingly to process header-sheets (38) the processing electronics (33) of the sheet feeder are separated from the machine control (34) and a preset number of header-sheets are taken from the header-sheet store (37) and fed to the stack of the sheet feed before being fed to the sheet processing machine with the link between processing electronics and the machine controller recreated.
