Abstract (en)

[origin: EP1353299A2] Electrical voting method in which a portable voting device is used and voting undertaken by pressing keys (20-23) in conjunction with voting choices shown on a screen. The vote entries are transmitted wireless to a central polling and evaluation unit. According to the method the central polling and interrogation unit transmits the polling questions to the voting devices prior to voting, the displays show the choices on the screen together with requirements for voting and after successful vote transfer to the central unit, it is confirmed on the screen. The invention also relates to a corresponding electronic voting system.
