Abstract (en)

[origin: EP1353529A1] The system has a simulator (4,7) for simulating a hearing loss and/or a hearing gain connected to a data network (8) for transferring data regarding the hearing loss and/or gain from the user to the simulator and for transmitting simulation data to the user. The data network includes the Internet and the simulator contains an analyzer (3) for analyzing the data relative to several hearing losses.
