Abstract (en)
[origin: EP1353530A1] The training system has a database (1) for storing several training programs and a training device for detecting (7) a user profile and carrying out (9) one of the several training programs in accordance with the user profile. The database is connected to the training device via a data network (6) that includes the Internet. The training device has a multimedia device for multimedia presentation of the training. AN Independent claim is also included for the following: a method of training hearing aid wearers.
