Abstract (en)
[origin: WO02055053A2] The invention relates to novel hair detergent and conditioning compositions comprising, in a cosmetically acceptable medium, an anionic surfactant, an amphoteric surfactant, at least one amphoteric polysaccharide selected from among celluloses, inulins and guar gums and with at least one water-insoluble conditioning agent selected from A) synthetic oils, B) silicones having a viscosity greater than or equal to 1,000 mm²/s, polysiloxanes, the general structure thereof comprising one or more organofunctional groups, C) animal or vegetal oils, D) waxes, E) carboxylic acid esters, F) ceramide-type compounds. The inventive compositions are intended for hair care and cleaning.
