Abstract (en)
[origin: WO02055214A1] The invention relates to a device for applying a coating medium to at least one part of the surface of an elongated workpiece (2) which is transported in its longitudinal direction. Said device consists of a coating chamber (3) which is subjected to a vacuum (3) and comprises an inlet matrix (5) and an outlet matrix (6), a coating frame (10) and an outlet guide (8) which is arranged upstream in relation to the outlet matrix (6).
