Abstract (en)

[origin: WO02055215A2] The invention relates to a device for the application of a coating medium to at least one partial surface of a rectangular workpiece, transported in the longitudinal direction thereof, comprising a coating chamber which may be evacuated with a similar opening, matching the cross-section of the workpiece, in both the inlet- and outlet-side walls and a slot nozzle, located in the coating head, which may be supplied with the coating material.
