Abstract (en)

[origin: WO02058937A1] The invention relates to a self-inking hand stamp (1) with a type element (2) that can be reversed by means of a reversing mechanism (7) and that carries stationary (3) and exchangeable (4) stamp types one beside the other. At least one stamp plate (17) that carries stationary stamp types (3) is disposed on the type element (2). The type element (2) is further provided with at least one recess (18) in which insertion projections (19) for exchangeable stamp types (4) can be inserted. A kit (26) comprising such a hand stamp (1) has a container (27) in which, in addition to the hand stamp (1), stamp types (4) and a tool (30) for inserting said stamp types are arranged.
