Abstract (en)

[origin: WO0246845A1] The invention relates to a packing strip (3) comprising a polymer film and used as a holographic data carrier. To this end, the packing strip (3) is designed to store holographic information. Holographic information can be entered into the packing strip (3) by means of a writing device (4), both before an object (1) is packed using the packing strip (3), and after.
